

Solid first half of 2013 for Bank REYL

Geneva, 7 October 2013. The REYL Group delivered solid growth in both assets under management and revenues over the first six months of 2013.

As at 30 June 2013, REYL & CIE's consolidated assets under management rose to CHF 9.3bn, representing a 26% increase since 1 January 2013. Consolidated revenues totalled CHF 59.1 million over the same period, registering a 64% increase on an annualised basis.

These results confirm the pertinence of a business model focused on a broad diversified offering, tailored specifically to the needs of global entrepreneurs and institutional investors.

While firmer economic conditions in the period along with the upturn in financial markets had a positive effect on business, REYL Group is reaping the rewards of the diversification strategy implemented over the past decade. Growth in core wealth management assets is matched by solid results in asset management, fund distribution and private office services, as well as in corporate advisory — a new line of activity launched in 2011.
